# we are the future of health

## hosa's competitive events program,

aligned with the National Healthcare Foundation Standards, helps students graduate and be career- and college-ready. We offer robust event categories including:

- Health Science
- Health Professions
- Emergency Preparedness
- Leadership
- Teamwork
- Recognition

The 57 competency-based events provide a variety of teaching strategies that health and biomedical science instructors can use to enhance student engagement and learning.

**employment in the health industry** is projected to grow 19% from 2014 to 2024, much faster than the average for all professions, adding about 2.3 million new jobs. Physical therapists, physician assistants, registered nurses, home health aides and personal care aides, pharmacists, dietitians and nutritionists are among the occupations highest in demand.

HOSA-Future Health Professionals provides opportunities for students to

develop, practice and refine their technical, leadership, and teamwork skills to achieve a seamless transition from education to a health career.

## hosa-future health professionals

recognizes the importance of providing students with training beyond health specific technical skills and plays a unique role in preparing students for higher education and entry level certification (EMT, CNA, pharmacy tech, etc.). The rapidly changing health industry needs dedicated health providers who are people-orientated and capable of being a valuable member of a health care team.
